S.No: 13	Exp. Name: ***Write a Program to print Multiplication Table for a given number***	Date:2023-01-23

Aim:

Write a program to print the `multiplication table` for a given number with the number of rows in the table.

For example, for a number `2` with `3` rows, the output should be:

```
2 * 1 = 2
2 * 2 = 4
2 * 3 = 6
```

At the time of execution, the program should print the following messages one by one on the console as:

```
Enter an integer number :
Enter number of rows :
```

For example, if the user gives the **input** as:

```
Enter an integer number : 5
Enter number of rows : 4
```

then the program should **print** the result as:

```
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
5 * 4 = 20
```

Note: Do use the **printf()** function with a **newline** character (`\n`).

Source Code:

Program411.c

```
#include<stdio.h>
int main()
{
   int num,row,i;
   printf("Enter an integer number : ");
   scanf("%i",&num);
   printf("Enter number of rows : ");
   scanf("%i",&row);
   for(i=1;i<=row;i++)
{
   printf("%d * %d = %d\n",num,i,num*i);
}
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter an integer number : 3

Enter number of rows : 6
3 * 1 = 3
3 * 2 = 6
3 * 3 = 9
3 * 4 = 12
3 * 5 = 15
3 * 6 = 18

Test Case - 2
User Output
Enter an integer number : 5
Enter number of rows : 4
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
5 * 4 = 20

Test Case - 3
User Output
Enter an integer number : 12
Enter number of rows : 7
12 * 1 = 12
12 * 2 = 24
12 * 3 = 36
12 * 4 = 48
12 * 5 = 60
12 * 6 = 72
12 * 7 = 84

Test Case - 4
User Output
Enter an integer number : 15
Enter number of rows : 10
15 * 1 = 15
15 * 2 = 30
15 * 3 = 45
15 * 4 = 60
15 * 5 = 75
15 * 6 = 90
15 * 7 = 105
15 * 8 = 120
15 * 9 = 135
15 * 10 = 150
