S.No: 27 Exp. Name: Write a C program to find the Length of a given string without using string library functions

## Aim:

Write a program to find the <u>length</u> of a given string without using string library functions.

At the time of execution, the program should print the message on the console as:

```
Enter a string :
```

For example, if the user gives the input as:

```
Enter a string : Ganga
```

then the program should print the result as:

```
Length 5
```

**Note:** Do use the **printf()** function with a **newline** character (\n) at the end.

## **Source Code:**

```
#include<stdio.h>
int main()
{
    char s[20];
    int i;
    printf("Enter a string : ");
    scanf("%s", s);
    for(i=0;s[i]!='\0';++i);
    printf("length %d\n", i);
    return 0;
}
```

## Execution Results - All test cases have succeeded!

```
Test Case - 1
User Output
Enter a string : Amaravathi
length 10
```
